Software Tester

Hi there!

*Posted on
October the 9th, 2019*

WolkAbout is looking for a Software Tester to join our team. As a Software Tester, you will work closely with our Development Team, in order to produce high-quality IoT software products.

Who we are

Founded in 2013 by a team of veterans in the industrial automation and software development industry, WolkAbout is one of the pioneering Industrial Internet of Things companies. We built a complete IoT application enablement platform and user-friendly tools to allow system integrators, product and service providers to develop and rapidly bring industrial-grade IoT applications to market.

With headquarters in Prague, Czechia, and a development centre in Novi Sad, Serbia, WolkAbout is simplifying digital transformation journeys worldwide.

Main responsibilities include:

- + Supporting software development team in producing high-quality software
- + Performing different software testing activities on the web and mobile applications, embedded software, API, etc.
- + Writing functional test cases
- + Managing bug life cycle (reporting, tracking, escalation, verification) by using bug-tracking tools, ensuring bugs are fixed and documented
- + Assisting developers in the bug reproduction and localization
- + Designing, implementation and performing automated and manual test scripts
- + Writing reports and communicating software quality findings to the management
- + Participation in requirements analysis
- + Sharing knowledge and experience with colleagues

Qualifications:

- + The understanding of the entire software development process
- + Knowledge of software testing and the testing process
- + 1+ years of working experience in the field of software testing
- + Ability to work independently as well as a team player
- + Being systematic, detailed and patient
- + Strong motivation
- + Good technical and problem-solving skills
- + Fluent in English (written and spoken)
